

Rainbow Slides

Print the game on card paper. Laminating will ensure durability. You will need pawns and a die to play this game. Children place their pawns off the game board beside the number 1. Either the youngest child can go first or have children roll and the person who rolled the highest number goes first. Children follow the numbers around the game board. If they land on the rainbow, they must slide down the rainbow with 'Twink'. First player to reach number 30 wins.
